COMBAT FIRST AID is down and dirty first aid that you can use to stay in the fight or save another's life.

COMBAT FIRST AID has had the honor and privilege of training over 7,000 Law Enforcement Officers, over 1,000 Fire/EMS Providers, as well as hundreds of private citizens. We have over 75 SAVES from students that have taken our course and rendered care on and off duty and saved lives!

Course Description:

COMBAT FIRST AID-CORRECTIONS OFFICERS

The COMBAT FIRST AID-Corrections course is specific to Corrections Officers. We recognize the challenges that Corrections Officers may face, the location of an incident, space constrictions, security for themselves and other inmates, as well as limited medical resources. The threats are unlike that of most critical incidents and can be exceptional. This training would be ideal for Range Instructors working with new or experienced shooters, officers transporting inmates between facilities, medical appointments, court hearings, and especially officers that carry a duty weapon as part of their duty assignment.

Transition time from a traumatic incident to a "safe scene", where medical staff or EMS is allowed, can be critical to whether necessary lifesaving treatment will be administered. This gap in time is often the deciding factor whether an injured person lives or dies. Proper trauma care administered by a Corrections Officer will save lives and offers a mitigation strategy to a problem that has historically been unaddressed. Most importantly it allows the officer to stay in the fight if injured and not lay there helplessly bleeding out.

The COMBAT FIRST AID course teaches the Corrections Officer to administer lifesaving treatment to themselves, a fellow officer, a citizen, or an inmate that has sustained a life-threatening injury. The class covers the three preventable causes of combat death and the treatment for all three. The training provided by COMBAT FIRST AID is developed from Tactical Combat Casualty Care (TCCC) – the most updated curriculum. The TCCC class is specific to trained medical providers but we have adapted the training, so it is relevant to the Corrections Officers and non-medical first responders

Agencies Trained
