

Western Regional Counterdrug Training Center

Analytical Tradecraft for Law Enforcement

The Analytical Tradecraft for LEA is a 3 day course that sets a foundation in intelligence analysis and integration into law enforcement operations. The course focuses on the fundamentals of analysis, the intelligence cycle, and intelligence analysis. These classes provide students with an introduction to the analytical process, critical thinking, and tools necessary to conduct analysis. Students will receive a basic overview of Open Source Information, Law Enforcement Effects Based Planning, and an Introduction to Threat Finance Analysis. These skills aid law enforcement and law enforcement support in providing effective actionable intelligence to strategic and operational initiatives.
