

WASHINGTON STATE SHERIFFS' ASSOCIATION

Professional Development Series

BLUE LINE LEADERSHIP

Course Description

This Track I course will deepen a student's understanding of leadership, followership, and self to improve their work and personal relationships with others. Information and skills developed in this course will assist students in gaining a broader perspective of the law enforcement profession, the personalities that exist in it, teams, culture, history, followership responsibilities, and leadership from wherever they're at within the police organization. Broaden your perspective, your impact, your happiness, and your Blue Line Leadership!

Target Audience

Blue Line Leadership is a great course for those influential peer leaders on your team; those who are thriving and those who have become disenfranchised, frustrated, or disappointed; those emerging leaders who desire to promote or achieve specialty assignments; and those who desire a deeper and broader understanding of our chosen profession.

This course is specifically designed for and restricted to deputies, police officers, FTO's, corporals, detectives, limited commission, and non-commissioned personnel of all tenure and assignment. No supervisors, command staff, or executives should attend this course for the class to have the types of open conversations it needs to have about today's law enforcement profession.

Career Level Certification (32 Hours)

Completion of this course counts towards elective hour requirements for Career Level Certification and annual 24-hour training requirements for Washington State law enforcement and corrections personnel.
